## Fluoropon® 70% PVDF Coatings

### Our Premium Finishes – Field-Proven for Beautiful and Long-Lasting Performance

Fluoropon is a premium fluoropolymer coating system. Formulated with 70% Polyvinylidene Fluoride (PVDF) proprietary resins and select organic and inorganic pigments, finishes are factory-applied in a continuous 2 or 3-layer process. Fluoropon coatings are designed to meet rigorous standards and are field-proven making them ideal for metal roofing and wall panels. With superior color and gloss retention, flexibility, and lasting resistance to ultraviolet rays, dirt and stains, chalk and fade, and chemical degradation, our Fluoropon coated products will maintain color and beauty for years to come.
